DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

   I. Claims 1 - 43, drawn to a process for applying microcapsules to a textile material, classified in class 156, subclass 276.

   II. Claims 44 - 67, drawn to a textile material having microcapsules, classified in class 442, subclass 123.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the final product as claimed does not require the process steps as recited and can be made by another and materially different process such as a process that doesn't require a treatment bath, but rather spray coats the microcapsules onto the textile material. Alternatively, the final product can be made by another and materially different process such as a process that doesn't require dispersing the microcapsules with a dispersant, but rather applies the microcapsules as solid particles directly to the textile without a dispersant.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

If applicant elects Group I from the restriction above,

Species A_1, wherein the microcapsule contains a moisturizing agent as apparently required in claims 19, 21, 31, 33, 38 and 40.

Species A_2, wherein the microcapsule contains a fragrance as apparently required in claims 20, 21, 32, 33, 39 and 40.

Species A_3, wherein the microcapsule contains a vitamin as apparently required in claims 22, 23, 34, 35, 41, and 42.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 – 18, 24 – 30, 36, 37 and 43 are generic.

If applicant elects Group II from the restriction above,

Species A_1, wherein the microcapsule contains a moisturizing agent as apparently required in claims 47, 49, 55, 57, 63 and 65.

Species A_2, wherein the microcapsule contains a fragrance as apparently required in claims 48, 49, 56, 57, 64 and 65.

Species A_3, wherein the microcapsule contains a vitamin as apparently required in claims 50, 51, 58, 59, 66 and 67.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 44 – 46, 52 –54 and 60 – 62 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. A telephone call was made to Michael Boggs on September 10, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Todd J. Kilkenny** whose telephone number is **(703) 305-6386**. The examiner can normally be reached on Mon - Fri (9 - 5).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Ball can be reached on (703) 308-2058. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
